

YOUR 5-STEP SECURITY DOOR GUIDE

STEP 1 SELECT YOUR SIZE

SECURE BY DESIGN. This new, revolutionary design is a highly resilient door. It's unique design results in a very high security door in a light-weight structure. "Secure By Design" door model has independently tested for light and heavy-duty tools such as crowbars and was never successfully opened during the test. This door model is available only in standard sizes and finishes making it an affordable and speedy solution in securing your property from unwanted visitors.

- "SECURE BY DESIGN" DOOR COMES WITH THE FOLLOWING FEATURES:**
1. Armoured lock
 2. High security cylinders with unique key management options
 3. A ten point multi locking system that secures the door on all 4 sides with;
 - Four bolts on the lock side
 - One bolt into the top of the frame and one into the bottom of the frame.

- Four 16mm diameter-locking bolts on the hinge side
- 4. Superior heat and sound insulation thanks to a thick layer of rock wool and double weather seals.
- 5. Extremely durable engineered-wood finishes
- 6. Fire Resistance
